

# Runway Enhancement & Apron Expansion 2011

[www.yqr.ca](http://www.yqr.ca) | It's Your Airport

Regina is booming.  
Our Airport is growing.

**The time for  
upgrading our  
infrastructure  
is now.**

Regina  
International  
Airport

# Runway Enhancement & Apron Expansion 2011

## What does the project include?

- Resurfacing of main runway (13/31) and cross-wind runway (08/26) - to provide 15 more years of runway life
- Addition of runway end safety areas (RESAs) - to enhance safety margin and anticipate future regulations
- Expansion of main apron - to increase aircraft parking space

## When is the project's construction?

**Start Date:** June 2011

**Projected Completion Date:** Fall 2011 (weather permitting)

## Will construction impact the community?

- The Airport will maintain regular operations through construction with no direct impact to passengers
- Aircraft flight patterns over Regina will change
- Large aircraft will make more frequent use of crosswind runway (east to west) and fly directly over Lakeview
- There will be an increase in aircraft activity over Regina

## How is the project being funded?

Regina Airport Authority, the non-profit community organization that receives no funding from any level of government, generates the income needed to manage and maintain the Airport. Funding for the \$16 million runway enhancement & apron expansion project will be provided through the Airport Improvement Fee (AIF), currently set at \$15 per enplaned passenger (as of May 2011).
